PRESENTATION

Front-end web developer with experience using multiple front-end ,and some back-end, technologies. I have been part of different projects that have helped me learn several technologies. I pride myself in my ability to quickly adapt to new projects and my desire to keep learning and improving my skills.

PROFESSIONAL EXPERIENCE

Frontend Developer at Itequia, 2023 – Present

- Started the development of Akute, a CRM SaaS. Developed as a SPA using React, I was responsible for the architecture of the frontend, setting up the test environment using Jest and creating CI/CD pipelines.
 - At TeamInsights I was responsible for the migration of the website to a modern standard using Angular, making sure to follow best practices and writing clean and maintainable code. During this time I improved the load time of the website as well as improved the developer experience by creating highly reusable components.
-

EDUCATION

Universitat Pompeu Fabra, 2018 – 2023

Bachelor's degree in Computer Engineering
